Device Installation Mounting Bracket (1900-4SSM)

STURDYMOUNT
HEPACART

The 4S STURDYMOUNT is a lifetime mounting bracket that makes installing devices easier, more time efficient and eliminates sagging in ceiling tiles.
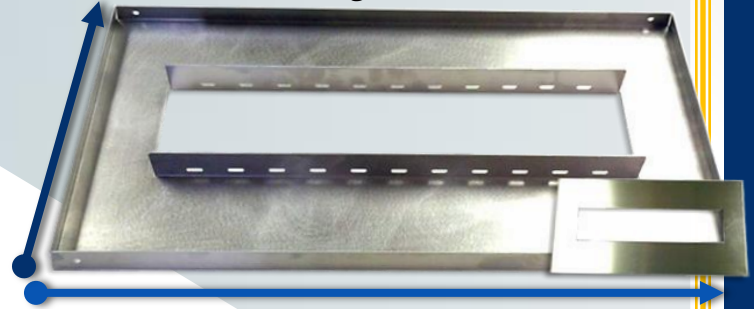

• SturdyMount can be mounted almost anywhere on a 2'x2 or 2'x4' tile. 'Provides exceptional mounting strength for larger electronic devices.

• Accommodates any standard 4S box from major manufacturers for nearly universal electrical device mounting.

• Light-weight (1 lb.) and one piece design, easy-to-use.

• Fits any 2 ft. x 2 ft. OR 2 ft. x 4 ft. suspended ceiling frame.

• Mounting bracket has a12 adjustable holes for 4S Box mounting and adjusts (slides) in the grid for virtually any mounting position.

• Eight support holes for mounting to the building structure.

• Sold in 6, 12, 24, 48 and 102 packs

• The device mounted with SturdyMount will stay mounted for its lifetime on the ceiling and will look great for the life of the ceiling.

Shown here as it would appear from in the ceiling grid from a side view with device mounted into the 1900 electrical device.

STURDYMOUNT
Mounting Instructions

1. Choose the installation locations for your device and cut a hole in the ceiling for the opening consistent with the device cover plate.
2. Position the 4S SturdyMount bracket over the hole in the ceiling tile and mark the position holes for the 4S electrical box.
3. Attach the 4S 1900 electrical box from inside/out and tightened from the inside to the SturdyMount.
4. Position the SturdyMount over the opening and attach mounting plate, install device.
